

Claas – JD Bridge

Allows a John Deere Monitor to steer a Claas Lexion combine

Feature highlights:

- Works on North American Claas Lexion combines after 2011/2012
- Allows the JD-monitor to autosteer the Lexion
- JD 2600 and JD 2630 monitors are supported
- The JD monitor creates yield and moisture data based on the existing Lexion yield and moisture sensors

Simple connections

- Plugs into existing Lexion 6-pin connector behind seat
- Cabling provided for JD Monitor and JD GPS receiver

GPS

- Use JD Starfire receivers to autosteer and create yield & moisture maps on the JD monitor
